

ArcaWorx

- Security and compliance assurance of public cloud projects while proactively monitoring for violations and breaches
- CSPM (cloud security posture management) with XDR (extended detection and response) capabilities
- Suite of products: ArcaScout (capture, assess, and report) and ArcaKnight (enforce)

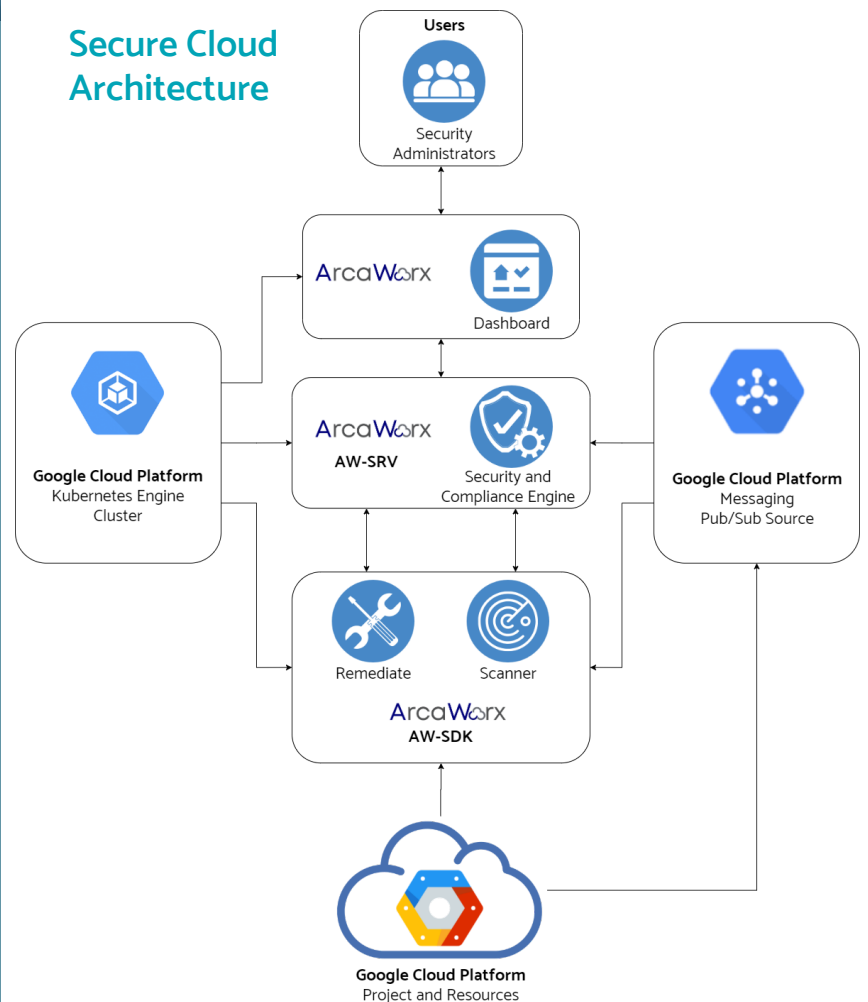

Customers and Team

- Active production deployment in healthcare, education, manufacturing and wellness
- 20+ years of experience in engineering, execution, technology adoption, strategy and management

Digital acceleration proved to be critical for business continuity during the pandemic times. New applications, built on new cloud infrastructures, are the new norm. These new environments, like their predecessors, require security and compliance validation to protect the confidentiality, integrity and availability of data.

According to Gartner, by 2023, 75% of organizations will restructure security governance to address the widespread adoption of digital acceleration, an increase from fewer than 15% today.

Secure Cloud Architecture

ArcaWorx Value

- Single pane view of all cloud assets with instant visibility of cloud security posture
- Active validation of cloud configuration and compliance
- Enhanced security posture and customized rules for ongoing governance cloud assets
- Automated remediation of cloud project security weaknesses
- Enforcement of desired compliance standards
 - Healthcare - HIPAA alignment
 - Retail and finance - PCI-DSS
 - Other industries - Custom or cyber security framework

NIST

PCI DSS COMPLIANT

ArcaWorx Use Cases

Infrastructure Asset Inventory Visibility

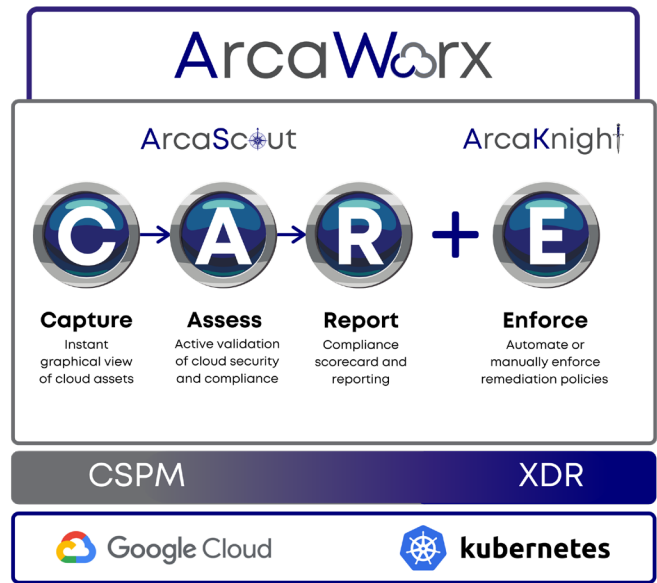

Infrastructure Incident Response

- Rapid detection & notification of critical resource updates
- Real time notification of compliance violations to Slack, email, pager, JIRA
- Anomaly detection and notification

Infrastructure Security

- Detects, notifies and enforces
- IAM configuration updates
- Cloud SQL instance updates
- Cloud storage bucket updates
- BigQuery
- Cloud functions
- Compute and GKE
- Network security posture changes

ArcaWorx Engagement

CAR+E Framework

ArcaWorx is optimized for the Google Cloud Platform and Kubernetes. The ArcaWorx suite of products delivers Cloud Security Posture Management (CSPM) and Extended Detection and Response (XDR). Our suite of products include:

ArcaScout

ArcaScout enables:

- Capture: Instant graphical view of cloud assets
- Assess: Active validation of cloud security and compliance
- Report: Compliance scorecard and custom reporting

ArcaKnight

ArcaKnight drives:

- Enforce: Automated enforcement of remediation policies

Together, ArcaScout and ArcaKnight complete the CAR+E Framework securing your digital transformation.
